

Please cancel Claims 1 and 7-16 as follows:

Claim 1 (Cancelled)

2. (Amended) A reflective liquid crystal display device, ~~wherein~~comprising:
a liquid crystal layer ~~is enclosed with~~ a pair of substrates arranged
opposing to each other and a seal member provided on ~~the~~a periphery portion of the
~~substrate pair~~ of substrates;
at least an organic film, a reflective metal film, an overcoat film, an
electrode layer, and an orientation film ~~are laminated on the~~a liquid crystal layer side
of one substrate of the ~~substrate pair~~ of substrates; and
wherein the organic film is formed in ~~the~~a region inside the end of
~~the~~an inner perimeter side of the seal member provided on the periphery portion of
the substrates.

3. (Amended) The reflective liquid crystal display device according to Claim
2, wherein the organic film is formed in ~~the~~a region 0 mm to 5 mm inside the end of
the inner perimeter side of the seal member provided on the periphery portion of the
substrates.

4. (Amended) The reflective liquid crystal display device according to Claim
2, wherein the end of the inner perimeter side of the seal member is arranged
outside an inclined portion formed on ~~the~~a surface of the electrode layer by the
overcoat film surmounting ~~the~~a height difference formed between the organic film
and the one substrate.

5. (Amended) The reflective liquid crystal display device according to Claim
2, wherein the overcoat film is formed ~~so as to cover the~~an end of the organic film.

6. (Original) The reflective liquid crystal display device according to Claim 2,
wherein color filters are directly formed on the reflective metal film.

Claim 7 -16 (Cancelled)
